ADMINISTRATIVE-INTERNAL USE ONLY

ADMINISTRATIVE-INTERNAL USE ONLY**I. Description****A. Software Summary**

This Lib-Label program will generate any number of labels, printed on a specific label form, from data card input. It will also produce an 80-80 listing of the input cards. It is executed in batch mode with cards. The labels generated, the 80-80 list, and the original card deck are returned to the requester.

B. Operational Flow Chart

1. Input Data

Sample Deck:

[illegible]

As part of the execution, the printer will halt and the message to mount label forms will appear on the console. The operator should mount circulation control labels and then answer the mount message.

ADMINISTRATIVE-INTERNAL USE ONLY

Also, output will be an 80-80 printer listing of the cards. The label printout and the listing should be returned to the requester together.

D. Program Execution

1. Equipment Required

- a. Univac 1100/80
- b. Printer
- c. Card Reader

2. Normal Run Instructions

- a. The operator should load the user supplied card deck for the Lib-Label program.

Mount labels when the following message appears on the console:

MOUNT LABEL FORMS

Then as part of the program execution, 20 labels with one line of the letter Z will be printed as a check to insure that the actual label data will be centered. The operator should try to center the label as much as possible.

3. Abnormal Run Instructions

- a. All messages should be directed to the user who submits the card deck.
- b. If a system or processing error occurs, the job should be rerun.

ADMINISTRATIVE-INTERNAL USE ONLY

2. Output Data

There will be consecutive labels output, one line of data to each label.
The number of outputs will depend on the number of data cards input.

Below is a sample of the size of the label form page to be used:
